TAGS:

1. Image (2)- I inserted an image of myself at the top of my website so that my viewers are able to make a connection with who created the page and feel more connected. I also inserted an image of myself at a philanthropy event raising money for St. Jude Children's Research Hospital because I am passionate about St. Jude and mentioned it in my website.
2. Table - I inserted a table to show the amounts my organization here at UGA has raised in the past two years for St. Jude Children's Research Hospital
3. Link (2)- I inserted two links so that my website visitors are able to contact me if they wish. I provided a link to two social media accounts and an email.
4. List - I inserted a list of my favorite restaurants in Savannah, GA so that my visitors are able to know me better and have references if they ever visit.
5. Form - I inserted a form for my visitors to fill out and pick which restaurant they would choose to go to from the list I previously provided. I did this so that the webpage was more advanced and cohesive throughout.
6. Input (5)- I created five input options for my visitors to choose from within the form.
7. Submit - I created a submit button for my visitors to use so that I am able to see feedback.
8. Footer - I inserted a footer at the bottom of the page so it is cohesive with the header styles I used throughout.
9. Headers (5)- I used different header tags throughout the web page to create cohesiveness and parallelism with my table and list.

STYLES:

1. Text Align - I used text align to make my page flow together and emphasis certain parts.
2. Color - I used background and text color to create a theme throughout my web page.
3. Background Color - I used background color so that my page reflected my personality
4. Underline - I used underline to emphasize certain parts of my web page.
5. Italics - I used italics to emphasize certain parts of my web page.
6. Bold - I used bold to emphasize certain parts of my web page.
7. Fonts - I used two different fonts to create emphasis on certain parts of my web page.
